

“SATAjet LIBERTY” – the special edition commemorative spray gun

This spring, SATA surprises us with a truly special edition spray gun: SATAjet LIBERTY, a limited edition of the high performance spray gun series SATAjet 3000 B, celebrating our American heritage, features a world class gun body finish: The entire spray gun is embellished with a stunning Stars and Stripes American flag with the Statue of Liberty displayed on the handle.

Due to its durable special surface coating this beauty is perfectly ready for everyday use in the paint shop, solvent and waterborne ready.

All painters/collectors can choose between the “*Super Saver*” HVLP version or the “*Super Fast*” RP version with optimized high pressure technology. Supplied only in the standard edition so as not to take away from the beautiful Statue of Liberty.

The special edition spray guns will be available from your SATA dealer in May, 2010.
